BROW BAR

MICROBLADING CLINICS

by Owner Gem and Manager Laura

Microblading is a way of implanting pigment under the epidermis using a specially designed tiny blade which leaves thin realistic hair strokes for the most natural semi permanent finish.

Together we design a brow which is totally bespoke to you and sparse or missing brows can be completely restored. Microblading is a fantastic treatment for anyone looking to improve or enhance the appearance of their eyebrows.

GEMMA our microblading specialist has 22 years experience and has spent the last 3 years specialising in Microblading. Working on perfecting client's eyebrows by correcting fronts, tails and heights to create your perfect brow.

LAURA has 8 years experience in Beauty and she has a huge passion for perfecting clients' eyebrows which has made her exceptional at Microblading eyebrows.

Consultation and initial 2 sessions..... Gem: £295 Laura: £235
1 1/2 hours for the 1st session and 1 hour for the second session to be done 4-12 weeks after the 1st session.

Colour refresh..... Gem: £125 Laura: £100
Available in the first 12 months after your second session.

How long does Microblading last?

From 10-12 months. Everybody is slightly different as it depends on how your skin accepts and holds the pigment. Over the next 12 months your natural under tone of your skin will want to change the original pigment colour, hence the need for a refresh

How long does it take?

1 1/2 hours for the 1st session and 1 hour for the second session to be done 4-12 weeks after the 1st session.

Does it hurt?

It varies from person to person. We use topical anaesthetics that are applied at the start and throughout if needed.

What will it look like after the procedure?

Your brows may be a little red and slightly swollen which is perfectly normal. The colour can be up to 50% darker for the first few days. This settles quickly to a soft, hair stroke appearance. The healing process on average takes 7 days.

Microblading is not suitable if you are pregnant or lactating.
